LQSA - FOG DISPERSAL SYSTEM

During the period of Winter season (from NOV to MAR) Sarajevo International Airport has put into the operation Fog Dispersal System.

The system will be in use during low visibility, RVR less than 800 M and air temperature less than -1°C (30° F).

Increasing visibility can be expected for an hour after the start of operation of the Fog Dispersal System.

The use of FOG DISPERSAL SYSTEM will have a direct impact on the achievement of TAF and TREND forecasts.

Meteorological phenomena resulting from the operation of this system will not be part of the METAR and LMR reports because they are not recognized by the international WMO / ICAO regulation.
